Re: ACS-Wireless, Inc.
CC Docket No. 94-102
E911 Quarterly Status Report

Dear Ms. Dortch:

Pursuant to the Commission's July 10, 2006 Order granting ACS-Wireless's Petition for Limited Waiver of 95% Handset Penetration for Anchorage and Fairbanks, ACS-Wireless, Inc. ("ACS-W") submits its second quarterly status report.

Please contact the undersigned if you have any questions regarding this report.

Sincerely,

Alaska Communications Systems

Lisa Phillips
Manager, Regulatory Affairs

**ACS-WIRELESS QUARTERLY REPORT
E911 HANDSET PENETRATION STATUS REPORT
February 1, 2007**

ACS-Wireless, Inc. ("ACS-W") submits its quarterly report pursuant to the Federal Communications Commission ("FCC") July 10, 2006 Order which granted ACS-W's for Petition for Limited Waiver of 95% Handset Penetration for Anchorage and Fairbanks. ACS-W submits the following information as required by the FCC's Order.

1) The number and status of Phase II requests from PSAPs (including those requests it may consider invalid).

ACS-W has received one request from the Municipality of Anchorage and met the required date of June 21, 2005. ACS-W anticipated additional PSAP requests before the end of 2006 and but did not receive any. ACS-W is now providing Phase II data for our CDMA subscribers.

2) The dates on which Phase II service has been implemented or will be available to PSAPs served by its network.

June 21, 2005 for the Municipality of Anchorage.

3) The status of its coordination efforts with PSAPs for alternative 95% handset penetration dates.

See response to question 1 above.

4) Its efforts to encourage customers to upgrade to location –capable handsets.

Since last filing, ACS has sent an additional direct mail to all TDMA/Analog customers further encouraging them to convert to CDMA through additional reminders of the many advantages of the CDMA network, especially the enhanced safety benefit of location-capable handsets, and also the many excellent promotional offers they could take advantage of when converting. All PrePaid TDMA accounts have been converted as described in the November report. Efforts to convert all remaining TDMA/analog customers continue through establishment of a new project team and reenergized tactics.

5) The percentage of its customers with location-capable phones.

ACS has satisfied the 95% penetration rate.

6) The status of its progress in increasing its network coverage beyond the footprint of its AMPS/TDMA facilities.

ACS-W's CDMA network now has coverage that compares to our TDMA network although ACS-W has not completely built over the existing TDMA/AMPS network.

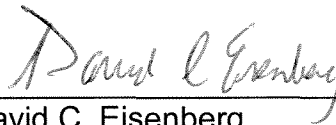

7) Detailed information on its progress in achieving compliance and whether it is on schedule to meet the revised deadline.

N/A

AFFADAVIT of DAVID C. EISENBERG

I, David C. Eisenberg, Senior Vice President of Corporate Strategy, Development & Marketing, Alaska Communications Systems, do hereby declare under penalty of perjury that I have read the foregoing ACS-Wireless "E911 Handset Penetration Status Report" and that the facts stated therein are true and correct, to the best of my knowledge, information and belief.

Executed on this 1st day of February, 2007.
